

## About Cloulditalia

Cloulditalia Telecomunicazioni is an Italian Company, founded in June 2012, specialized in the provisioning of **Telecommunication** and **Cloud Computing** integrated services dedicated to the specific needs of SMEs. In December 2018 become part of IRIDEOS Spa.

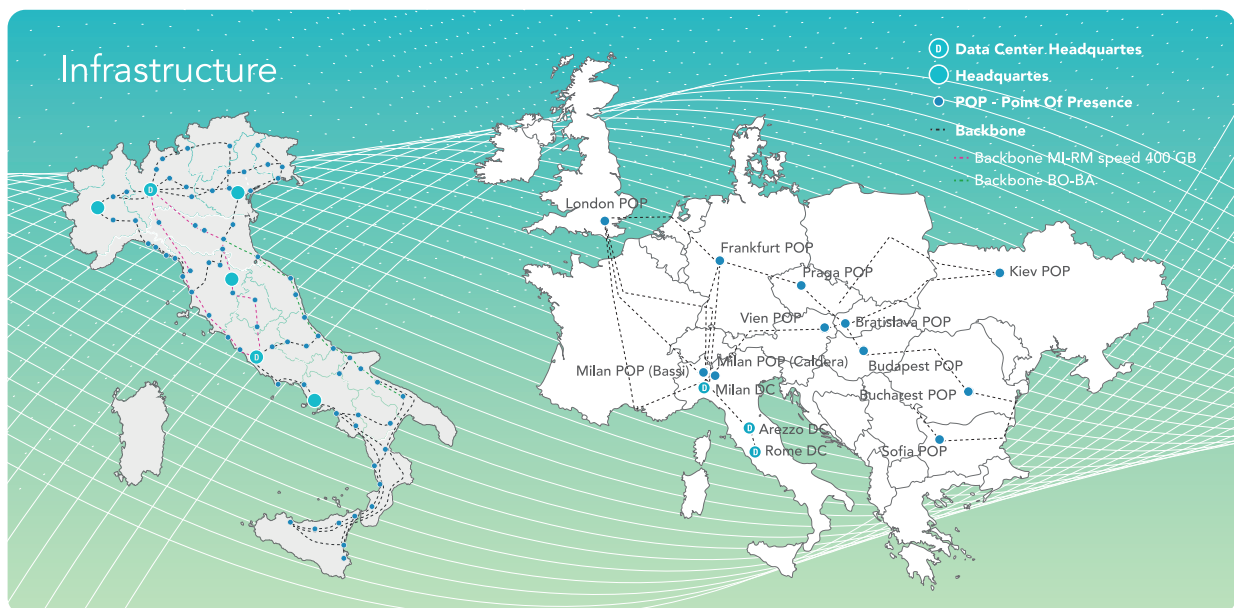

The company owns a proprietary fiber network with 15,000 km all over the country (equal to 330.000 km of fibre cables) and **two Data Center** (Rome and Milan) dedicated to Cloud Computing services.

In order to provide ICT services that meet the needs of Italian SMEs, is required *adequate infrastructure, technical expertise and knowledge of customer needs.*

Cloulditalia built on these three milestones a bidding strategy, only achivable with the total control of every step of this process. The highest quality of the services, the hardware and software technology are guaranteed by the support of our technological partners, leaders in the global market.

Partners collaborate with Cloulditalia to accelerate the **process of digitalization of companies** by ensuring freedom and control.
